**QUINSTREET RATING PLATFORM**

Introducing QRP Agent Portal 2.0

A Smarter, Faster, More Connected Way to Sell Insurance

We're thrilled to introduce **QRP's Agent Portal 2.0**, the next major evolution of the QuinStreet Rating Platform's agent-facing experience. Designed with the agents in mind — QRP's product team has conducted agent interviews and analyzed the existing product's pain points to reimagine Agent Portal.

Agent Portal 2.0 features next-generation improvements to streamline the comparative rating experience, which includes:

- A simplified intuitive interface to reduce friction during the quoting process
- A new overview page to easily manage customer information
- An enhanced bundling experience with flexible navigation and more accurate rates
- The ability to compare coverage to ensure the agents provide their customers the best choice
- AI-driven features which provide intelligent recommendation and an integrated support assistant to empower your agents with more insight
- Upgrades on data quality and workflow efficiency with new data indicators, the ability to upload declaration pages and additional integrated data sources like Canopy Connect

These improvements reflect our ongoing commitment to giving agents the tools they need to work smarter and close more business. Whether you're new to QRP or already a partner, the new Agent Portal experience is designed to elevate every step of the quoting and binding workflow.

QRP AGENT PORTAL 2.0

A new Agent Portal designed to enhance quoting workflows, introduce AI-driven intelligence, and help agents close more business.

Modernized, Streamlined Interface	AI-Powered Assistance	Refreshed Quoting Experience	Enhanced Automation Tools
