

Flood Insurance

Every home is a flood risk. Now you can quote it, bundle it, and close it — all in one place.

Flood damage is the most common and costly natural disaster in the U.S., yet standard homeowners policies don't cover it. That coverage gap is a missed conversation — and missed premium — for every agent who isn't quoting flood alongside home.

QRP Flood Insurance gives your team access to both NFIP and private flood options on a single platform, with real-time rates that display directly in the consumer experience. Whether you're bundling flood with home and auto or offering it standalone, QRP makes the conversation easy and the close faster.

The private flood market has grown substantially since 2020, driven by NFIP reform and rising consumer awareness. Customers are significantly more likely to purchase flood coverage in the 12 months following a major flood event. QRP puts you in position to meet that demand.

WHAT'S NEW— KEY CAPABILITIES

QRP's Flood offering meets your agency where you are — whether you need a seamless workflow integration, a better agent experience off the shelf, or a way to bring flood directly into the consumer journey. You've got the option that fits.

FEATURE DETAIL

Already have an agent portal or workflow? We'll fit in.

- If your agents are already working in a system, QRP connects via API — no disruption to what's working.
- Real-time flood rates embedded directly into your existing quoting flow
 - Flood shows up in the quote — not as a separate conversation
 - Supports standalone flood quotes, home + flood, and home + auto + flood bundles

Benefit: Flood becomes part of every home quote automatically — which means higher attachment rates without changing your team's workflow.

Need a better agent experience off the shelf? QRP's portal is ready today.

- If you want a polished agent interface without building your own, QRP's portal has flood built in.
- Quote flood directly inside the existing QRP agent portal
 - No separate login, no separate system, no retraining
 - Available to agents already using QRP today

Benefit: Your team starts quoting flood today — without new tools, without friction, without delay.

Want to deliver flood directly to customers and capture revenue at the door?

- QRP's consumer-facing flow lets you bring flood into the customer's quoting experience directly.
- Flood rates surface within the consumer-facing quote interface
 - Customers see flood as part of their coverage picture — not a separate add-on
 - Supports bundled and standalone flood in the consumer flow

Benefit: You capture flood premium at the moment of highest intent — when a customer is already shopping for coverage.

PRIVATE FLOOD CARRIER ACCESS

Across all three delivery paths, QRP connects your agents to both NFIP and private flood carriers on one platform.

- Access to NFIP and private flood products side by side
- Higher limits available through private options— beyond NFIP's \$250K building/\$100K contents caps
- Private options include replacement cost settlement, additional living expenses, and increased cost of compliance coverage

Benefit: You can match the right coverage to every risk— not just the risks that fit inside NFIP limits. That means more competitive quotes and stronger client conversations.

WHY THIS MATTERS

Every missed lead is lost revenue. Every delayed response is a missed opportunity. Omni-X changes that. Our powerful AI-driven platform helps brands instantly connect with consumers, qualify leads faster, and drive more sales through personalized, real-time interactions across SMS, voice, chat, and digital channels.

For your business, that means:

- Incremental premium from customers who already trust you with their home coverage
- Higher attachment rates when flood is bundled with home or home + auto
- Stronger client retention — agents who offer comprehensive protection are harder to replace
- Competitive differentiation when private flood options give clients choices their current agent can't match

The market timing is real: private flood has grown substantially since 2020, consumer awareness rises after every major weather event, and standard home policies will never fill the coverage gap.

QRP AGENT PORTAL 2.0

A new Agent Portal designed to enhance quoting workflows, introduce AI-driven intelligence, and help agents close more business.

NFIP + Private Flood on One Platform

Real-Time Rates

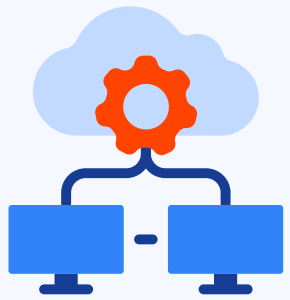

Agent Portal Ready

Bundling Built In
